## CONFERENCE

The International Conference on Interactive Collaborative Robotics (ICR) was established as a satellite event of the International Conference on Speech and Computer (SPECOM) in 2016. The conference gathers together experts from different communities to discuss challenges of human and robot collaboration in industrial, social, medical, education and other areas. Fundamentals and means for collaborative behavior of one or multiple robots with physical interaction with people in operational environment equipped embedded sensor networks and cloud services in conditions of uncertainty and environmental variability are the main issues of the conference. ICR2022 will be held online and offline.

## SUBMISSION OF PAPERS

Authors are invited to submit a full paper not exceeding 12 pages formatted in the Springer LNCS style. Each paper will be reviewed by at least three independent reviewers (single-blind), and accepted papers will be presented either orally or as posters. Papers submitted to ICR 2022 must not be under review by any other conference or publication during the review cycle, and must not be previously published or accepted for publication elsewhere.

The authors are asked to submit their papers using the on-line submission system:

<https://easychair.org/conferences/?conf=icr20220>

Papers presented at ICR2022 will be published in the EI-indexed proceedings and some selected top papers will be included in special issues of several SCI-indexed journals.

## The topics of interest include, but are not limited to

Assistive robots	Child-robot interaction
Collaborative robotics	Educational robotics
Human-robot interaction	Medical robotics
